12) RACE START PROCEDURE:

Standing Starts:

A one minute & 30 second countdown will take place in the assembly. Vehicles will then be released from Assembly Area round the Circuit on their green flag lap, it is the competitor's responsibility to maintain their grid position, marshals will direct you to the correct grid position. Once this lap has been completed and vehicles are stationary and in their correct positions the 5-second board will be shown and then the red lights on the overhead gantry will be displayed, at a time between 2 and 7 seconds the red lights will switch off signaling the start of the race.

Rolling Starts:

Vehicles will be correctly positioned in the assembly area, then proceed as directed onto the grid from where they will begin the rolling lap behind a Lead Car. Once the Lead Car has pulled off the circuit you must remain in grid order. As the cars approach the start/finish line the red lights on the overhead gantry will switch off signaling the start of the race. In the event of circuit light failure for either start type the Union/National flag will be used to start all races.

At the end of each track session, be it qualifying or the actual race, all vehicles must slow down after taking the chequered flag and leave the circuit as directed by officials at the Esses bend, returning to Parc Ferme as required.

If a race has to be stopped and it is not possible to re-run it within its allocated time schedule, it may be transferred to the end of the programme and re-run if time permits.
