All Reserves will practice (subject to [NCR Ch.12 App.6 Art.3.6](#)) and replace withdrawn or retired entries in Reserve Number order. If Reserves are given Grid Places prior to issue of the first Grid Sheets for any round the times set in Practice shall determine their grid positions. If Reserves are given places after publication of the grid sheet and prior to cars being collected in the Official "Assembly Areas" they will be placed at the rear of the Grid and be started without any time delay. Otherwise, they will be held in the Pit lane and be released to start the race after the last car to take the start has passed the start line or pit lane exit, whichever is the later. Such approval to start MUST be obtained from the Clerk of the Course.

### 2.2 BRIEFINGS

Organisers will notify competitors of the times and locations for all briefings in the Final Instructions for all meetings. Briefings are mandatory so competitors must attend all briefings; if a driver misses a briefing they may be liable to a fine.

### 2.3 QUALIFICATION PRACTICE

- 2.3.3 If mechanical means are used by the marshals to remove the car to a safe position, the car concerned cannot re-join the session. Where deemed necessary, the Clerk of the Course may at [their](#) sole discretion allow a car to re-join the session but any future laps it completes in that session will not be timed or will be disallowed.
- 2.3.4 At the end of each session, all drivers must cross the Finish Line only once.

## 2.5 STARTS

- 2.5.1 All cars will be released to form up the grid prior to the start in formation as specified on the grid sheet.
- 2.5.2 The start will be via a rolling start.

The minimum countdown procedures/audible warning sequence shall be:

- I. 1 minute to start of Pace lap - Start Engines/Clear Grid.
  - II. 30 Seconds - Visible and audible warnings for the start of Pace lap.
  - III. A green flag will be shown, and the Pace Car will depart from its position ahead of the front two cars on the grid signifying the start of the Pace Lap(s). All drivers must follow the Pace Car whilst maintaining their two by two grid formation positions and their distance from the car in front. No excessive weaving or brake testing is permitted on Pace Lap(s).
  - IV. Towards the end of the Pace Lap(s), the Pace Car will extinguish its lights and then exit the circuit and the red lights will be switched on at the start line. All drivers must maintain the same Pace Lap speed and must maintain their two by two positions and distance from the car in front. If one or more cars have been removed from the starting grid, these gaps must not be closed up.
  - V. As the leading two cars approach the start line, the red start lights will be extinguished signifying the race start. For the avoidance of any doubt, all cars must maintain Pace Lap speed until the start lights are extinguished. Only once the red lights have been extinguished is acceleration and overtaking permitted. As long as the red start lights have been extinguished, it is permitted to overtake before the start line.
- 2.5.3 Any car removed from the grid after the 1-minute stage or driven into the pits on the Pace Lap shall be held in the pit lane and may start the race after the last car to take the start from the grid has passed the start line or pit lane exit, whichever is the later to take the start from the grid.
- 2.5.4 Any driver unable to start the Pace Lap or start the race is required to indicate their situation as per [NCR Ch.12 App.6 Art.6.11](#). In addition, any driver unable to maintain their grid position on the Pace Lap to the extent that all other cars are ahead of them may complete the lap but MUST remain at the rear of the last row of the grid but ahead of any cars to be started with a time delay.
- 2.5.5 In the event that the starting lights fail the Starter will revert to using the National Flag.

2.5.6 Only Vehicles that are on the grid or at the end of the pit lane during the start procedure will be considered to be under starters orders. Any Vehicle that is not present during the start procedure will not be permitted to take part in the race.

## 2.6 SESSION RED FLAG

2.6.1 Should the need arise to stop any race or practice, RED LIGHTS will be switched on at the Start Line and RED SIGNALS will be displayed at the start line and at all Marshals Signalling Points around the circuit.

This is the signal for all drivers to cease circulating at racing speeds, to slow to a safe and reasonable pace and to return to the pit lane, during practice, and to the starting grid area, during a race, unless otherwise directed by officials.

Cars should not enter the pits unless directed to do so and all cars in the pit lane during a red flag period must take any restart from the pit exit.

### 2.6.2 Case A – Less than two race laps completed by the race leader.

The race will be declared a “No Contest” and available competitors will restart from their original grid positions. Competitors unable to take the restart may be replaced by reserves who will start from the back of the grid in reserve order. Gaps on the grid should not be closed up. The Clerk of the Course may order that the duration of the re-run of any race shall be a shorter distance than originally scheduled or may be abandoned altogether. The duration of the re-run will be determined as the duration of the race.

### 2.6.3 Case B – More than two race laps completed by the race leader but less than 75% of the scheduled duration.

Any race stopped after the leader has completed more than two laps but less than 75% of its duration will be considered as the first part of the race. Competitors will be restarted from a grid set out in the finishing order of this first part, which shall be based upon the order of crossing the finish line at one lap less than the number of laps completed by the leader at the time of first showing the Red Signal. Only vehicles which are proceeding under their own power, in accordance with NCR Ch.12 App.8 Art.1.7.j at the showing of the Red Signal will be classified in this first part (NCR Ch.12 App.6 Arts.9.1.c and NCR Ch.12 App.6 Arts.9.2-9.3 also apply). The result of the race will be the finishing order at the end of the restarted race (see NCR Ch.12 App.6 Arts.9.1.d).

### 2.6.4 Case C - More than 75% of race completed

If the leader has completed more than 75% of the race distance or duration it shall not be restarted and the results will be declared in accordance with NCR Ch.12 App.6 Arts.9.1.e, unless the Clerk of the Course, in consultation with the Stewards deems it appropriate to restart the race.

- 2.7.3.2 Refuelling must only be carried out in the pit lane and only by means of a fuel churn with a capacity of no more than 25 litres, or by using a refuelling rig which complies with FIA requirements. [NCR Ch.12 App.11 Art.2.4 applies.](#)
- 2.7.3.3 Unless contained in an FIA compliant fuelling rig, no more than 50 litres of fuel per [competing car](#) can be located in the pit lane or pit garage at any time. Decanting of fuel between containers must not take place in the pit lane or pit garages.
- 2.7.3.4 Whilst refuelling [is taking place](#), at least one additional person must stand by the refueller with a fully operational [and effective](#) fire extinguisher readied. Any person carrying out refuelling or on standby with an extinguisher must wear a safety suit in accordance with [NCR Ch.9 Art.3.3.f](#), and also fire-resistant gloves. It is also a mandatory championship requirement that any person carrying out refuelling or on standby with an extinguisher must also either wear a fire-resistant balaclava and protective goggles, or a race type helmet with a closed visor. [Any refueller or person providing fire cover must not wear a high-vis vest during refuelling, unless it is flame retardant and complies with the standards listed in NCR Ch.9 Art.3.3.f. However, should they work on the vehicle during the pit stop whilst not refuelling they must wear a high-vis vest during that time \(Article 3.2.11 refers\).](#)
- 2.7.3.5 Should any car require an additional person to assist with refuelling, then that person must also fully comply with 2.7.3.4.
- 2.7.3.6 It is highly recommended that hot external areas close to the fuel filler location, such as exhaust tips and brakes are covered with a flame-resistant material whilst refuelling is taking place.
- 2.7.3.7 Whilst refuelling is taking place, it is not permitted for anyone else to work on the car for any reason whatsoever. For the avoidance of doubt, this includes touching any part of the car in any way, including checking tyre pressures, cleaning windows, wiping bodywork etc.
- 2.7.3.8 Whilst it is permitted for an exiting or entering driver to take the role of a refuelling assistant, it is not permitted for a driver to physically refuel a car before entering the cockpit to drive.
- 2.7.3.9 For the avoidance of doubt, all safety related aspects of article 2.7.3 will be rigorously enforced by the organisers, and non-compliance will result in a minimum penalty as per article 4.2.10.

Footage from this or any other camera may be requested, obtained, copied and used to investigate any incident which is subsequently brought before the Clerk of the Course for investigation, or which is reported to the Championship Co-ordinator by any person. The decision to request and review any such video footage is at the discretion of the Clerk of the Course, Stewards of the Meeting or the Championship Co-ordinator.

It is the competitor's sole responsibility to ensure safe installation and effective operation of the camera equipment. At all times cameras must be fitted in accordance with [the NCR](#) and be approved by the Chief Scrutineer in accordance with [NCR Ch.7 App.9](#).

At least one camera must be mounted rearward of the driver, with captured footage showing the steering wheel as well as a clear forward-facing view of the circuit through the front screen.

In the event that no captured footage (as detailed in 2.13) is made available by any competitor to the Clerk of the Course, Stewards of the Meeting or the Championship Co-ordinator on their request, sanctions may be applied which may include but are not limited to disqualification from any qualifying session or race, and / or from the Championship.

## **2.14 PARC FERMÉ**

At all events the showing of the Chequered Flag (for both Qualifying and Racing) will indicate the commencement of Parc Fermé Regulations. Any vehicle that is in the pit lane at this time will be under Parc Fermé rules.

It is prohibited to work on any vehicle after the chequered flag has been shown. This includes tyre pressure checking, wheel changes or changes of driver unless authorised by the Eligibility Scrutineer or their Deputy.

Any vehicle in the pit lane must be immediately taken to the designated Parc Fermé area. No team personnel may enter Parc Fermé unless authorised by the Eligibility Scrutineer or their Deputy.

No tools of any type may be passed by team members or mechanics to drivers whilst in Parc Fermé unless authorised by the Eligibility Scrutineer or their Deputy.

Competitors are reminded that the area designated as Parc Fermé area is a secure area and it is not permitted for any supporters to be in Parc Fermé unless at the behest of the eligibility scrutineer or their deputy.

3.1.2 It is imperative that we promote the safety and wellbeing of young people and adults at risk. In addition to this all participants must be aware of their behaviour and conduct at all times and abusive language and harmful behaviour will not be tolerated. Any such incidents must be reported to the Championship Coordinator and/or Safeguarding Officer who will also relay the report Motorsport UK. ## 3.2 RACE PIT STOPS

3.2.1 Each car is required to complete two mandatory pit stops within the duration of the race.

Cars must not cross the pit entry line for their first mandatory pit stop until a 20-minute race duration has elapsed. From that point in time, a Pit Open board will be displayed on the Start / Finish line for a period of 5 minutes.

The pit stop window for mandatory stops will close 15-minutes before the end of the scheduled race duration. A Pit Closed board will be displayed on the Start / Finish line for a period of 5 minutes after the expiry of the pit window period. Cars must not cross the pit entry line to begin a mandatory pit stop after the expiry of the allocated pit window period.

3.2.2 Each mandatory Pit Stop must be for a minimum duration of 3-minutes unless whilst the Safety Car is Deployed in which case Art. 3.2.12 of these regulations will apply. A Pit Stop will be timed from the PIT IN timing line to the PIT OUT timing line. The Pit lane speed limit for each individual venue will be published in the event Final Instructions.

3.2.3 For additional or non-mandatory pit stops, the 3-minute minimum PIT IN to PIT OUT time does not apply.

3.2.4 When making a pit stop, cars must stop at a 45 degree angle on the pit apron area facing their allocated pit garage. On completion of a pit stop it is not permitted for the car to reverse back into the pit lane. This must only be done by pit crew manually pushing and guiding the car whilst the driver is in full control of the vehicle from the driver's seat.

3.2.5 Should any car require to enter a pit garage at any point in a race, it can do so by either driving directly into the garage, or stopping in a safe position in the pit lane then being pushed backwards into the pit garage by pit crew whilst the driver is in full control of the vehicle from the driver's seat. Upon exiting the pit garage, if facing forward toward the pit lane the car may be driven from the garage. Otherwise, it must be pushed from the pit garage under the guidance of pit crew and whilst the driver is in full control of the vehicle from the driver's seat.

3.2.6 If performing a driver change, the incoming driver must not loosen or remove their harness, FHR device, helmet or gloves until the vehicle is fully stopped in the pit lane [or pit garage](#).

3.2.7 [Deleted](#).

3.2.8 Unless refuelling is taking place at a pit stop (mandatory or otherwise), there is no requirement for a driver to exit the car.

3.2.9 Refuelling, driver changes, physical vehicle inspections or repairs may only be performed whilst the vehicle is completely stationary.

3.2.10 Subject to the pit lane and pit stop window being open, [and subject to Article 3.2.12 of these regulations](#), it is permitted to make pit stops whilst the race is running under safety car conditions.

3.2.11 A maximum of 4 people can work on the car at any pit stop, and they must be identified by wearing a high visibility tabard. This number excludes the driver but includes anyone touching the car or driver in any way, including but not limited to such actions as cleaning windows, assisting the driver with belts, operating jacks, opening or closing doors, bonnets or boots.

3.2.12 While the race is running under safety car conditions, subject to the pit window being open, competing cars may stop in their pits to carry out mandatory pit stops. However, any car that enters the pit lane and crosses the PIT IN timing line during the pit window after the safety car boards, flags and/or lights have

been deployed must comply with an extended minimum pit stop duration, this duration [in accordance with the table below](#). Upon conclusion of a safety car period, this extended minimum pit stop regulation will remain in force for all cars until they have crossed the start/control line at least once under racing conditions.

This regulation will not be applicable to cars that entered the pit lane and crossed the PIT IN timing line before the safety car boards, flags, and/or lights were deployed.

### **4.3 SOCIAL MEDIA**

Social media, including, but not restricted to, facebook, Instagram, Twitter etc. is a powerful and wide reaching medium for the expression of views and opinions, and the sharing of photographs and video. As such, competitors should be aware that their conduct on social media regarding the Championship, the BRSCC and its drivers should reflect the impact social media has. If a competitor is considered to have brought the Championship and the BRSCC into disrepute in the opinion of the Championship Stewards they may be subject to a penalty or disqualification from the Championship. Additionally, competitors are reminded that the Motorsport UK monitor social media and any remarks that are deemed to bring the sport into disrepute can lead to penalties.

## 5. TECHNICAL REGULATIONS

### 5.1 INTRODUCTION

The following Technical Regulations are set out in accordance with the Motorsport UK specified format and IT SHOULD BE CLEARLY UNDERSTOOD that if the following texts do not clearly specify that you can do something, then it is your own responsibility to seek clarification from the Championship Organisers in advance of making modifications or changes to your car.

Where a technical issue is disputed, the decision of the Championship Organisers shall be final. This includes their acceptance or otherwise to allow participation in the Championship races, or assessment of suitability, and of allocation to specific classes.

Acceptance of entry into either the race or a specific class will be at the sole discretion of the Championship Organisers.

To ensure the fairest and most competitive racing, the Championship Organisers reserve the right to amend any Championship regulation as they believe appropriate, and at any time.

Should a competitor be concerned that their car, or any part fitted to their car may not fully comply with any specific technical regulation, it is the responsibility of the competitor to contact the Championship Organisers to discuss these concerns prior to placing a race entry.

### 5.2 GENERAL DESCRIPTION

The BRSCC SuperSport Endurance Cup is a Championship open to competitors participating in closed wheel two wheel drive petrol powered production based cars. The Championship Organisers dictate that “production based” means vehicles based on cars with a proven history of being made available for public sale, and which were originally designed for general road use.

Subject to meeting all technical regulations, Caterham cars are permitted to enter.

The driver’s seat must be positioned entirely to one side of the longitudinal centre line of the car.

The following vehicles are not permitted to participate in the championship:

Sports prototype cars, cars fitted with engines of less than 4 cylinders (excluding rotary engines, which are permitted), cars fitted with motorcycle-based engines, open wheeled cars, custom-built one-off cars, low volume kit cars, cars featuring any kind of four-wheel drive system, vehicles originally designed for commercial usage such as vans or pick-ups, and some factory-built race cars (such as TCR cars or spaceframe cars such as Ginettas).

This is not an exhaustive list, and the Championship Organisers reserve the right to refuse an entry to any vehicle.

To ensure fair competition the Championship Organisers reserve the right to classify any car into whichever Class they believe fair. The Championship Organiser’s decision will be final.

The Championship Organisers reserve the right to permit a competitor to change their car at any point during the season. This will only be permitted after a full technical comparison of the replacement car against the car which it is replacing. The replacement car must be of the same model, type, engine capacity and its declared power to weight being equal to the car it is replacing.

Competitors found to have changed cars without adhering to the above process may be subject to disqualification from an event, and/or have championship points deducted relative to those scored since the replacement car had been used.

### 5.2.1 Class Structure

Based on BHP per Tonne. BHP figures will be calculated at the flywheel, and weight calculated by weighing the whole car including all consumables, post-session fluids, and ballast (and without the driver). It should be noted that vehicle weights will be checked under post session parc fermé conditions.

**Pro-A** Cars with a power to weight ratio of between 311 – 350bhp/tonne.

**Pro-B** Cars with a power to weight ratio of between 271 – 310bhp/tonne.

**Pro-C** Cars with a power to weight ratio of between 231 – 270bhp/tonne.

**Clubman-A** Cars with a power to weight ratio of between 191 – 230bhp/tonne.

**Clubman-B** Cars with a power to weight ratio of between 151 – 190bhp/ tonne.

**Clubman-C** Cars with a power to weight ratio of up to 150bhp/tonne.

**Invitation** Any car that the organisers consider to be unsuitable for placement in any of the above classes, or cars belonging to competitors not fully registered for the championship, but which in the organiser's opinion fits within the spirit of the championship. Competitors racing in the invitation Class will be ignored for the purposes of race and class positions, points scoring and awards.

5.2.2 To allow the Championship Organisers to allocate each car into the correct class, competitors must declare their cars' bhp/tonne (in accordance with 5.2.1) at the time of registration for the championship.

Prior to the acceptance of registration/entry, the organisers reserve the right to order that a competitor provide the organisers with a dyno power graph demonstrating the power figure being used in their BHP/Tonne declaration. The dyno power graph must include details of the power testing location, date, vehicle information. Failure to comply may result in the organisers refusing registration and/or entry.

Should any car subsequently be modified in any way that might affect the competitor's original bhp/tonne declaration, it is the competitor's responsibility to inform the Championship Organisers of this prior to starting any race.

5.2.2.1 A mobile dyno service provider as chosen by the Championship Organisers may be in attendance at Championship race meetings. To ensure compliance with the Championship Class structures, the Championship Organisers reserve the right to instruct any competitor to present their car to the dyno provider for power testing at any time throughout a race meeting. From the moment of this instruction being given to a competitor, their car will be considered to be under parc ferme conditions, and no alterations or changes to the vehicle will be permitted without the authorisation of the Championship eligibility scrutineer.

Failure to comply with the Championship Organisers instruction to present a car for power testing through any race meeting (whether before or after qualifying or the race), may result in disqualification from the official results for that event.

The car owner / competitor / operator is fully responsible for presenting it to the dyno provider with all fluid levels checked and correct, and all mechanical aspects of the car in a suitable condition to allow it

to be safely tested (multiple times if required). Cars will be tested in accordance with the dyno provider's normal processes. Should any owner / competitor / operator have any concerns about either their cars' ability to complete a test, or the manner in which it is / has been tested, they must raise these concerns immediately with the dyno provider's staff and the Championship Organisers. Neither the dyno provider nor the Championship Organisers will accept any liability for any mechanical failure or breakage that may occur through power testing or at any time afterwards.

### 5.2.3 Examination of Vehicles

The Championship Organisers (in addition to any other powers they may have under these Regulations) reserve the right, before or after any race in the Championship to designate any one or more of the competing cars for special eligibility scrutineering. Upon such election being made the competitor shall immediately place the car under the control of the Championship Organisers and be deemed to have permitted all such scrutineering, examination and testing as the Championship Organisers may responsibly require to undertake.

5.2.4 The Championship Organisers reserve the right to re-inspect any car at any time during the course of the season.

5.2.5 Competitors will be personally and solely responsible for ensuring that their cars comply with their registration details, bhp/tonne declaration, and with the technical regulations for each event at which they are entered. Failure to comply in any respect will be a breach of these regulations.

**5.2.6** For the purposes of ratifying power figures, at any event the Championship Organisers reserve the right to instruct that any competitor (at their own cost) take their car to an independent dyno facility for power testing at any point within the championship season. The dyno facility will be chosen by the organisers, with the geographical location being agreed between the organisers and the competitor. Failure to comply with this process or failure to provide full details of the required power testing results ahead of the subsequent event entered may result in the matter being referred to the Championship Stewards for the imposition of a Penalty. Should the Championship Stewards find the Entrant to be in contravention of this regulation, they will apply a Championship points penalty equal to the number of points scored for the event concerned. Additionally, the organisers reserve the to refuse further race entries until such time the request has been complied with.
